

Sure-Strike® Makes Deadbolts Dead-On.

Having trouble locking your deadbolts? Worried about door security? Always moving your strike plate when the weather changes? Then trash that useless piece of metal you have on your doorframe right now and install a Sure-Strike, the revolutionary new strike plate. Patent-pending Sure-Strike brings your home's strike plate – and door security – into the 21st century.

ALIGNMENT & ADJUSTABILITY BENEFITS

EASE AND RELIABILITY – Sure-Strike's patent-pending pin system guarantees your deadbolts will slide perfectly into place every time.

A RELIABLE DEADBOLT – With Sure-Strike, deadbolt "sticking" caused by shifting foundations, settling doorframes and swelling doors is a thing of the past.

FIXES HARD-TO-TURN DEADBOLTS – Sure-Strike puts a halt to wrestling with hard-to-turn deadbolts – making it ideal for seniors, children and anyone with strength issues.

ENERGY EFFICIENCY – Your Sure-Strike saves energy by pulling doors tight against weather stripping – it prevents drafts and eliminates rattling doors.

INEXPENSIVE LONG-TERM SOLUTION – Sure-Strike makes life easier! After a quick installation of Sure-Strike, you'll never have to reposition your strike plate again!

SAFETY & SECURITY BENEFITS

DEADBOLTS ARE SAFER – Pin system allows bolts to fully extend (if the deadbolt is not fully extended, the deadbolt is not locked and is easy to pry open).

INCREASED STRENGTH – Two 3-1/2" steel screws and the pin system housing extend into studs making the weakest part of the door, the doorjamb, the strongest.

ADDED PROTECTION – Much larger strike plate made of steel.

Your door really isn't secure without Sure-Strike.

Take a long look at your strike plate. If it's like 99% of what's on the market today, it's just over 2 inches long and held on by tiny 3/4" screws. Why does that matter? When someone tries to kick in your door, they only need enough force to rip out the strike plate on your doorjamb. Only a few kicks stand between a criminal and your family, your home, and your possessions. *Even* if you have an expensive deadbolt.

Adding a Sure-Strike is like extending your deadbolt deep into the frame of your home.
